OWNER MODULE – MOBILE APPLICATION

Precondition: The owner account exists and is authorized for owner-level access.

Postcondition: A secure owner session exists and the Owner Dashboard is displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-01	Owner Login and Account Access	As the owner	I want to log in to the mobile application with my authorized owner credentials	so that I get owner-level access to the sales and inventory of all three branches

Precondition: The owner is logged in and sales and inventory records exist.

Postcondition: The latest saved information of all three branches is displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)

OWNER MODULE – MOBILE APPLICATION

OM-02	Owner Dashboard	As the owner	I want a dashboard showing total recorded sales, branch sales summaries, inventory status, low-stock items, expiration alerts, and recent activities	so that I can monitor all three branches in one screen even when I am away from the stores

Precondition: The owner is logged in and completed sales have been recorded by the branches.

Postcondition: The selected sales information is displayed read-only.

No.	**Epic**	**Persona (User)**	**I want to (action)**	**So that (benefit)**
OM-03	Sales Summaries	As the owner	I want to review recorded sales for selected dates and branches, including products sold, transaction details, and payment information	so that I can see how each branch and product is performing

OWNER MODULE – MOBILE APPLICATION

Precondition: The owner is logged in and opens Sales Summaries.

Postcondition: The total recorded sales for the selected day are displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-04	Daily Sales Summary	As the owner	I want to view the total recorded sales for a selected day	so that I can check how much the business sold on that day

Precondition: The owner is logged in and opens Sales Summaries.

Postcondition: The total recorded sales for the selected week are displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)

OWNER MODULE – MOBILE APPLICATION

OM-05	Weekly Sales Summary	As the owner	I want to view the total recorded sales for a selected week	so that I can follow weekly sales performance

Precondition: The owner is logged in and opens Sales Summaries.

Postcondition: The total recorded sales for the selected month are displayed.

No.	**Epic**	**Persona (User)**	**I want to (action)**	**So that (benefit)**
OM-06	Monthly Sales Summary	As the owner	I want to view the total recorded sales for a selected month	so that I can follow monthly sales performance

OWNER MODULE – MOBILE APPLICATION

Precondition: The owner is logged in and opens Sales Summaries.

Postcondition: The sales of each branch for the selected period are displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-07	Branch Sales Summary	As the owner	I want to view the sales of each branch for the selected period	so that I can compare how the three branches are selling

Precondition: The owner is logged in and opens Sales Summaries.

Postcondition: The products sold and their quantities for the selected period are displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-08	Products Sold Summary	As the owner	I want to view the products sold and their quantities for the selected period	so that I can see which products sell the most

OWNER MODULE – MOBILE APPLICATION

Precondition: The owner is logged in and inventory records exist for the three branches.

Postcondition: The selected branch's inventory or the branch comparison is displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-09	Multi-Branch Inventory Monitoring	As the owner	I want to select a branch to view its inventory and compare inventory between branches	so that I can see which branch has too little or too much stock and decide where attention is needed

Precondition: The owner is logged in; minimum stock levels and expiration alert periods are configured.

Postcondition: The current alerts of all three branches are displayed.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)

OWNER MODULE – MOBILE APPLICATION

OM-10	Low-Stock and Expiration Monitoring	As the owner	I want to see low-stock and expiration alerts from all three branches	so that I can support my replenishment and spoilage-prevention decisions

Precondition: The owner is logged in and branch discrepancies have been submitted.

Postcondition: The discrepancy is reviewed; when the owner validates the count, the expected inventory is overwritten with the validated actual c

No.	**Epic**	**Persona (User)**	**I want to (action)**	**So that (benefit)**
OM-11	Review Inventory Discrepancies	As the owner	I want to review the discrepancies and count correction requests submitted by branches and validate counts by authorizing an adjustment	so that the expected inventory is overwritten with a verified count only with my approval and a complete record

OWNER MODULE – MOBILE APPLICATION

Precondition: The owner is logged in and records exist for the branches.

Postcondition: The selected record type is displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-12	View Sales and Inventory Records	As the owner	I want to review historical sales and inventory records across all three branches, kept separate by type	so that I can check business and inventory activity even when I am away

Precondition: The owner is logged in and opens Records.

Postcondition: The sales transaction records are displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)

OWNER MODULE – MOBILE APPLICATION

OM-13	Sales Transaction Records	As the owner	I want to view the recorded sales transactions of all three branches	so that I can verify individual sales

Precondition: The owner is logged in and opens Records.

Postcondition: The Sales Consumption records are displayed read-only.

No.	**Epic**	**Persona (User)**	**I want to (action)**	**So that (benefit)**
OM-14	Sales Consumption Records	As the owner	I want to view the ingredient consumption calculated from completed sales	so that I can verify what the system deducted for each sale

OWNER MODULE – MOBILE APPLICATION

Precondition: The owner is logged in and opens Records.

Postcondition: The Stock-In records are displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-15	Stock-In Records	As the owner	I want to view the recorded Stock-In transactions	so that I can see what stock entered each branch

Precondition: The owner is logged in and opens Records.

Postcondition: The waste and spillage records are displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-16	Waste and Spillage Records	As the owner	I want to view recorded waste, spillage, spoilage, and other losses	so that I can identify where stock is being lost

OWNER MODULE – MOBILE APPLICATION

Precondition: The owner is logged in and opens Records.

Postcondition: The physical inventory count records are displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)
OM-17	Physical Inventory Count Records	As the owner	I want to view the recorded physical inventory counts	so that I can see what was counted and how it compared with the expected quantity

Precondition: The owner is logged in and opens Records.

Postcondition: The authorized adjustment records are displayed read-only.

No.	Epic	Persona (User)	I want to (action)	So that (benefit)

OWNER MODULE – MOBILE APPLICATION

OM-18	Authorized Adjustment Records	As the owner	I want to view the adjustments I have authorized	so that I can audit every correction made to the expected inventory

Precondition: The owner is logged in.

Postcondition: The account information is displayed; after confirmed logout the session ends and the Login screen is shown.

No.	**Epic**	**Persona (User)**	**I want to (action)**	**So that (benefit)**
OM-19	Owner Profile and Logout	As the owner	I want to view my permitted account information and log out securely	so that I can confirm which account I am using and protect my business data

No.	Acceptance Criteria (System Requirements)
OM-01	1. The Login screen shows an “Email” field, a “Password” field with a Show/Hide control, and a “Log In” button. 2. The password is masked by default; the Show/Hide control reveals or masks it. 3. If the email or password is blank, an inline error appears under the empty field (e.g., “Please enter your email.”, “Please enter your password.”) and no request is sent. 4. When both fields are filled and “Log In” is tapped, a loading screen (a spinner with the text “Logging in…”) covers the form, the fields and the button are disabled so the request cannot be sent twice, and the screen closes as soon as the system responds. 5. If no account matches the email, “Email not found. Please check your email.” is shown under the Email field; if the email exists but the password does not match, “Incorrect password. Please try again.” is shown under the Password field; no session is created in either case and the Password field is cleared. 6. If the system does not respond within 10 seconds or there is no internet connection, the loading screen closes and “Unable to connect. Please check your internet connection and try again.” is shown; the entries are kept and “Log In” is enabled again. 7. If a branch staff account is used, the system verifies the role, does not grant owner-level access, and shows an access error message. 8. If the credentials are valid and the role is owner, the system creates a secure session and grants access to the records of all three branches. 9. After authentication, the Owner Dashboard is displayed. 10. Passwords are handled by the authentication service and are never stored or shown as plain text, except while Show is active.

OM-02	1. The dashboard is the first screen after login and shows a “Total Recorded Sales” card with the combined recorded sales of the three branches. 2. A period selector on the sales card changes the period shown and updates the amount. 3. Branch sales summary cards show the recorded sales of Branch 1, Branch 2, and Branch 3 for the same period; tapping a card opens that branch’s Sales Summaries. 4. An Inventory Status summary shows the number of items that are Normal, Low Stock, and Out of Stock across the branches. 5. A Low-Stock Items list shows the affected ingredient, branch, expected quantity, and minimum stock level; “See all” opens Low-Stock and Expiration Monitoring. 6. An Expiration Alerts list shows the ingredient, branch, and recorded expiration date of items needing attention; “See all” opens the expiration alerts. 7. A Recent Activities list shows the latest sales and inventory records with type, reference or item, amount or quantity, and branch; tapping a row opens its details. 8. Pull-to-refresh or a refresh control reloads the data, and returning to the dashboard shows the latest saved information. 9. Skeleton placeholders are shown while loading; if loading fails, “Unable to load data. Please check your internet connection and try again.” is shown with a “Retry” button; if no records exist yet, each card shows an empty state message.

Postconditi uantity and the discrepancy is marked Adjusted.

No.	**Acceptance Criteria (System Requirements)**
OM-11	1. The discrepancy list shows each item with branch, difference, date and time, and review status (Pending Review or Adjusted), with branch and status filters; Pending Review entries appear first, and pending count correction requests appear in the same list with a “Correction Request” tag. 2. Tapping a discrepancy opens its details: item, expected quantity, actual quantity, difference, branch, date and time, submitting employee account, and the staff remarks if any. 3. A Pending Review discrepancy shows a “Validate Count” (authorize adjustment) button; an Adjusted one shows its adjustment record instead. 4. “Validate Count” opens a form with the previous expected quantity and the counted actual quantity (read-only), an Adjusted Quantity equal to the validated actual quantity (read-only), and a required Reason field. 5. If the Reason is blank, confirmation is blocked and the field shows an error. 6. “Confirm” opens a confirmation dialog stating the item, branch, and that the expected quantity will be overwritten with the validated actual quantity; nothing is applied until the owner confirms. 7. On confirmation, the branch’s expected quantity is overwritten with the validated actual quantity, the count status changes to Validated, and the discrepancy status changes to Adjusted. 8. While the record is being saved, a loading indicator with the text “Saving…” is shown and the buttons are disabled so the record is created only once; if saving fails or the connection is lost, the indicator stops, “Unable to save. Please check your internet connection and try again.” is shown with a “Retry” button, and the entries are kept. 9. A success message is shown and the adjustment appears in Authorized Adjustment Records and in the branch’s Transaction History. 10. A correction request shows the original value, revised value, reason, requesting employee account, date and time, with “Approve Correction” and “Reject Correction”; approving updates the count and keeps the original value, revised value, editor, date, and time, and rejecting leaves the count unchanged. 11. While a correction request is pending, “Validate Count” is disabled for that count, and a count that was already validated cannot receive a correction request.
